TECH SKILLS

- Design Patterns
- Architecture Patterns
- System Designs & Integrations
- Vision and Strategy

SOFT SKILLS

- Communication
- Conflict Resolution
- Mentorship
- Problem Solving

TECH STACKS

- NestJS
- NextJS
- Java
- React
- Ruby on Rails
- GraphQL

SUMARY

Extremely self-motivated Software Architect with the ability to be proactive with project execution.

This includes 14 years of experience and passion for software development and learning new technologies as well as designing software systems using agile software development with systems written in Java, J2EE, Groovy on Grails, Ruby on Rails, and lately in my career focus in Frontend Architecture: AngularJS, VueJS, Angular, ES6, NodeJS, React and Redux.

EXPERIENCE

○ Senior Full Stack Software Engineer

Sydecar.io - 2022 to Present

As an Individual Contributor at Sydecar, I have been at the forefront of driving innovation and delivering impactful solutions. My primary focus has been on contributing major features and seamlessly integrating banking APIs, utilizing technologies such as RestTS, TypeScript, and PostgreSQL.

- Feature Development: achieved many integrations with different vendors and architecting Payments module
- Banking Integrations.
- Frontend and Backend integrations, and migration of legacy.

○ Technical Leader

Insider.com - 2020 to 2022

As a key member of the development team at Insider.com, I played a pivotal role in advancing the technical landscape of the company. Leveraging my expertise in GraphQL, Node.js, TypeScript, and gRPC, I spearheaded the planning and execution of innovative projects as CMS and integrated Authentication that significantly contributed to the foundation of the new CMS.

SQL SKILLS

- PostgreSQL
- MySQL
- Prisma
- Sequalize.

NoSQL Skills

- MongoDB.
- Cassandra
- CouchDB

INTERESTS

- Retro Computing
- Software Architecture
- Artificial Intelligence

HOBBIES

- Running
- Guitar Playing
- Commodore 64

EXPERIENCE

Software Architect

Globant 2012 to 2020
As a seasoned Software Architect with a decade-long tenure at Globant, I played a pivotal role in shaping the technological landscape for various clients. My leadership and design expertise spanned a diverse range of technologies, including TypeScript, JavaScript, AngularJS, React, Jenkins/TFS, CordovaJS, Node.js, Sencha, Java, PostgreSQL, MongoDB, and Cassandra.

- Team Leadership: Led and mentored multidisciplinary teams in the development and implementation of robust software architectures. Provided technical guidance and support, fostering a collaborative and innovative work environment.
- Architecture Design: Designed and implemented scalable and efficient architectures tailored to meet the unique requirements of diverse clients. Embraced a technology-agnostic approach, ensuring the selection of optimal solutions based on project needs.
- Technology Stack Mastery: Demonstrated proficiency in a wide array of technologies, from front-end frameworks like AngularJS and React to back-end technologies such as Node.js, Java, and databases like PostgreSQL, MongoDB, and Cassandra.
- Continuous Integration/Continuous Deployment (CI/CD): Implemented CI/CD pipelines using Jenkins and TFS, streamlining the development and deployment processes for increased efficiency and reliability.
